

Louisville and Southern Indiana's biggest roadblock is also its biggest building block

Louisville has an economic stimulus plan. It's called the Ohio River Bridges Project.

Build Now

As members of Greater Louisville's Advanced Manufacturing & Logistic Network, we strongly urge you to contact your local, state and federal representatives and get them behind the project.

The input has been received. The studies have been completed. The designs have been created. Now, it's time to build.

Grow Now

The bridges and Spaghetti Junction rebuild will ensure Louisville and Southern Indiana continue to prosper and grow. The project will add more than 40 acres of usable land adjacent to Louisville's waterfront and cross-river lanes for biking and walking.

Move Now

Louisville ranks near the top of mid-size cities in the amount of traffic congestion. On average, a local commuter wastes one full week per year of his or her life sitting in traffic – which is detrimental to our economy, our environment and our quality of life.

Jobs Now

Construction will create 56,000 jobs... and that number does not include the jobs that will be created when the Bridges Project is completed. We are already a transportation hub for the U.S. with 144,000 jobs in logistics and manufacturing. This project ensures we will continue as a leader in this industry.

Safety Now

Our existing bridges and Spaghetti Junction do not meet safety standards, and were not built to handle current traffic flow. All three bridges lack emergency lanes. It's a recipe for disaster.

CALL NOW

Make your voice heard and let's get this project moving. Tell Kentucky's lawmakers to pass legislation now for Bridges Project construction.

Call 800-372-7181

The network is a member of The Bridges Coalition – www.thebridgescoalition.com

The Following Advanced Manufacturing & Logistics Network Members Support The Bridges Project

Advance Distribution Services, Inc. (ADS)
 Advantage Industrial Automation
